

Nurse Tank Placard and Marking Requirements

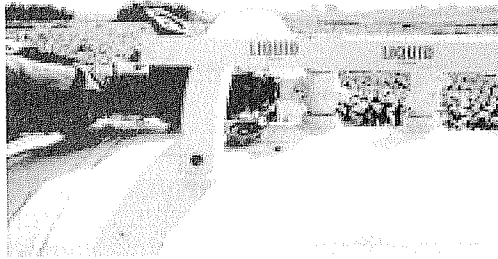

Anhydrous Ammonia Nurse Tanks must have the following placards and markings:

- **Placards** - Four (4) DOT non-flammable gas 1005 placards - one on each side and one on each end.
- **Markings**- Four (4) "ANHYDROUS AMMONIA" markings - one on each side and one on each end. Letters must be green and at least 2 inches in height.

Two (2) "INHALATION HAZARD" markings - one on each side in green letters at least 3 inches in height.

FIRST AID PROCEDURES must be listed on the tank.

VALVES must be clearly labeled or color coded: Orange/Red for liquid and Yellow for vapor.

- **SMV** - SLOW MOVING VEHICLE sign (SMV) on rear of trailer and at least 2 feet above the ground. Speeds must be 25 mph or less when SMV is displayed.
